

The new standard in surgical mesh identification

Safety in the OR starts with reliable identification

About Erba-Med

As a partner in medical technology, Erba-Med is committed to reliability, innovation and ease of use.

Our smart and user-friendly CareWare solutions support healthcare institutions in improving workflows, enhancing patient safety and using data more effectively.

We develop all our solutions in close collaboration with the field — ensuring they are truly effective and help minimize risks.

Sterile departments (CSSDs) in hospitals and clinics face a variety of daily challenges:

- Peeling stickers release microplastics — posing risks to both patient and instrument
- Metal tags can become damaged or corrode — potentially contaminating autoclaves and washers
- Illegible labels cause confusion and delays — sometimes even resulting in postponed surgeries

This increases the risk of patient complications, additional maintenance, higher costs – and potential legal claims:

- Increased maintenance costs for equipment
- Reduced machine lifespan due to contamination
- Higher risk of contamination of medical devices
- Potential liability claims in case of complications
- Autoclave failure may lead to postponed or relocated surgeries — resulting in high hospital costs

Erba Tag

Designed for surgical mesh

To improve safety and efficiency in hospitals and clinics, Erba-Med developed the Erba Tag for surgical mesh.

Erba-Med combines years of experience in medical logistics with smart technology.

The Erba Tag was developed with real-world practice in mind – with one clear goal: maximum safety and efficiency in medical processes.

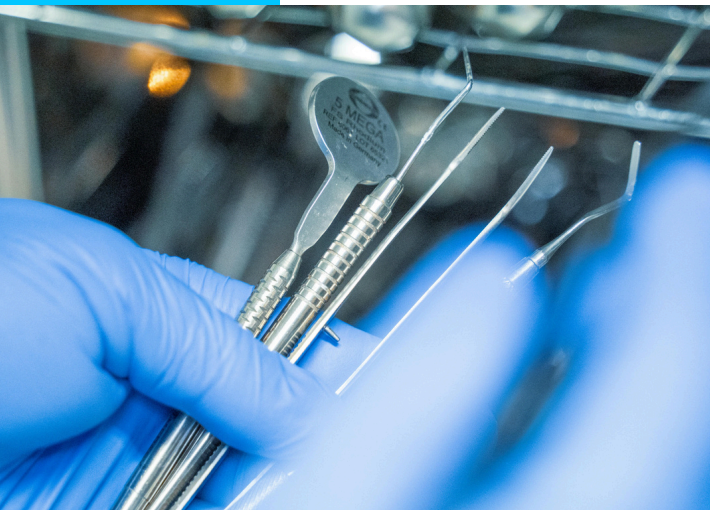

Durable | Efficient | Safe

What makes Erba Tag superior to current alternatives?

- ✓ **No microplastics** – no more peeling stickers
- ✓ **No corrosion** – no risk of damaged or contaminating labels
- ✓ **Longer lifespan** – both the material and barcode marking last for years
- ✓ **Minimum 5-year warranty** – including free replacement in case of damage
- ✓ **Cost-effective pricing** – more affordable than traditional solutions in the long run

Less risk – more control – better care

Intelligent
identification?

Better care

Inventory control

The Erba Tag integrates seamlessly with existing workflows and numbering systems.

This ensures full inventory control and increases the reliability of every medical device.

Bring reliability into your facility with the Erba Tag:

- No more worries about illegible labels or missing mesh
- Instant status updates in a single scan (storage, ready for use, in the OR)
- Automatic inventory tracking and integration with digital systems

Leading the way in
medical traceability

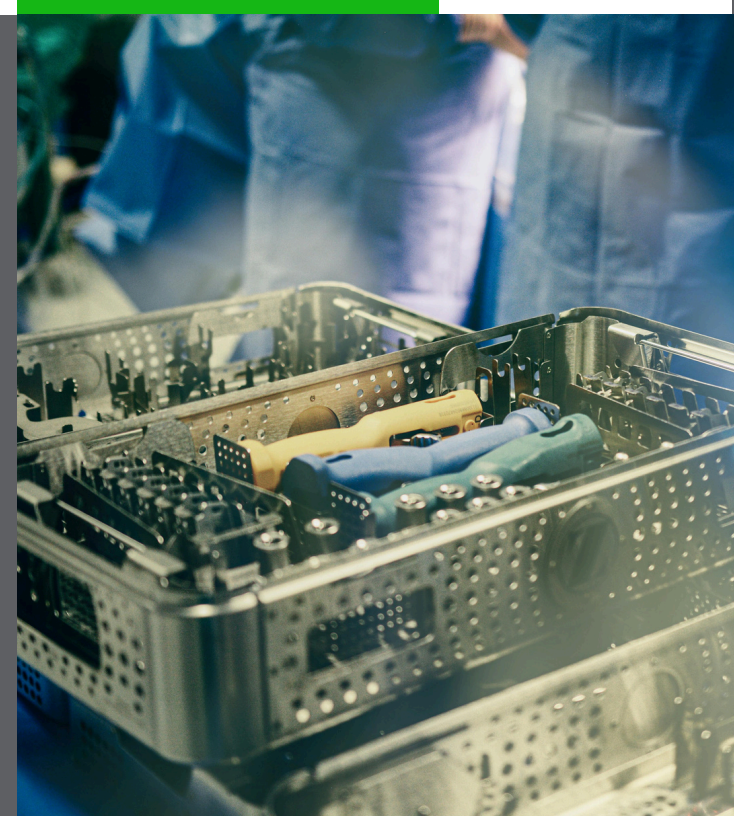

Reliability
Innovation
User-friendly

Designed for

- Hospitals & clinics
- Sterilization departments (CSSD)
- Medical logistics & inventory management

Erba Tag availability

- Available individually or in bulk
- Custom coding options available
- Technical support provided during implementation

Smart ID sets the foundation for safety in the OR

Technical overview

- Resistant to temperatures from -30°C to +220°C
- Durable material – reusable without loss of quality
- Barcode remains readable – even after thousands of autoclave or washer cycles

Driving progress in medical traceability

Would you like to evaluate what the Erba Tag could mean for your facility?

We are happy to visit your facility for a demonstration and to share more about our additional services.
